LB 216A, 382A

balcony. Would you stand and be recognized? Stand up everybody. Welcome to the Legislature. Next bill on General File is 216A Mr. Clerk.

CLERK: Mr. President, LB 216A (read title).

PRESIDENT: The Chair recognizes Senator Reutzel.

SENATOR REUTZEL: Mr. President, members of the body. Briefly I believe that this is \$10,000 for the Department of Banking to carry out the measures contained in 216. I would move for the advancement of the A bill.

PRESIDENT: Any discussion on the advancement of 216A? Seeing none the question before the House is the advancement of 216A. All those in favor vote aye, opposed vote nay. Record the vote.

CLERK: 25 ayes, no nays Mr. President on the motion to advance.

PRESIDENT: LB 216A is advanced to E & R Initial, which brings up LB 382A.

CLERK: Read LB 382A.

PRESIDENT: The Chair recognizes Senator Venditte. Senator Venditte. Senator Labedz, who wants to take it? You have got three ways we can....

SENATOR VENDITTE: Mr. Speaker, I think that Senator Labedz is prepared to do just that.

PRESIDENT: All right, Senator Labedz.

SENATOR LABEDZ: Thank you Mr. Speaker. I don't believe that the fiscal note in the book is correct. We did receive a slightly different fiscal note but I still don't believe that the Health Department, who is against the bill, I believe that they have upped the cost slightly. Senator Wesely introduced an amendment on General File to LB 382 which would test laetrile for purity. This, of course, is now being tested at random and at the border and some in California and there is a possibility that it could be manufactured here in the State of Nebraska and therefore I see no reason for his fiscal note which he is saying that we need a laboratory scientist at \$15,000. This could be contracted out. I think that your fiscal note shows anywhere from a thousand to fifty thousand. So, actually until this bill moves further, we have no exact idea as to how much it is
